

CASE STUDY

Chris Auto Shine Detailing

Premium Business Website — Designed, Built & Launched

THE CLIENT

Chris Auto Shine Detailing — an Australian automotive detailing company that needed an online presence as premium as the cars they work on.

THE CHALLENGE

No website. No way for customers to browse services, see pricing, or get in touch online — and in a visual business like detailing, looking unpolished online means losing customers before they even call.

WHAT I BUILT

- Fully responsive landing page — hero, services, pricing packages, testimonials, contact
- Dynamic, reusable pricing-package components and interactive service modals
- Mobile-first design tested across phones, tablets, and desktops
- Lightweight internal management system to track bookings and finances
- Optimized production build (Vite) for fast load times and instant navigation

TECH STACK

React • Tailwind CSS • Vite • JavaScript • PostCSS • ESLint

THE RESULT

- Live, professional site: chrisautoshinedetailing.com.au
- Fast-loading, mobile-optimized customer experience
- A digital storefront that finally matches the premium quality of the business itself

“World-class work. Freelancer price.”

— Dann Lopez, Full-Stack Developer

WHAT THIS MEANS FOR YOUR BUSINESS

Whether you run a restaurant, salon, clinic, auto shop, or any local service business — I build the same standard of site for you: clean code, mobile-first design, fast load times, and a look that makes your business feel as trustworthy online as it is in person.

Ready to start?

Message me with a bit about your business and I'll recommend the right package — **Basic** (landing page), **Standard** (+ full SEO), or **Premium** (+ management dashboard & blog).
